DESCRIPTION

TeamLogicIT is a computer service company with a difference. We are a national network that specializes in the needs of small and mid-sized businesses. Our services often start with quick-response troubleshooting and repair of desktops, servers and online systems. But we also offer additional levels of consultation and maintenance service that previously have been available only to large corporations. Building our own national infrastructure gives our small and mid-sized clients several advantages. First, we can repair virtually any IT problem quickly and accurately, because our technicians can access a national knowledgebase of computer service information as well as our network of technicians across the country. Secondly, this infrastructure will help keep your downtime to an absolute minimum. With our Preventative Maintenance Package we can proactively provide virus protection updates, real-time remote back-up of all your data and remote diagnostics. Our flexible, affordable approach allows the small and mid-sized business to choose only those services you need today and expand your service as your needs grow.
